

JENNY MIDDLETON

SCHOOL:

Fairfield High School for Girls

COURSE:

Level 3 Engineering

CAMPUS:

Openshaw

WHAT ATTRACTED YOU TO THE MANCHESTER COLLEGE?

I looked around at a few colleges and realised I didn't want to restrict myself to one type of engineering so this course was perfect for that.

HOW HAS YOUR TIME AT TMC INFLUENCED YOUR AMBITIONS?

The work placements have allowed me to meet with professionals and apprentices in the industry gaining valuable experiences.

WHAT ARE YOUR CAREER GOALS?

I am thinking about maybe taking a gap year to gain some more experience or go to university to study either Aerospace Engineering or Aircraft Engineering with Pilot Studies. I would love to work within the airline industry either as a pilot or an engineer.

HOW HAVE YOUR TUTORS PREPARED YOU FOR YOUR CAREER?

We have had lots of presentations around different careers, trips to universities and lots of visits from real people working in the industry.

WOULD YOU RECOMMEND TMC?

Yes. The course is great if you don't want to specialise in a particular area of engineering because it covers a broad range of industries.
